Examination June - 2025

PCC-DS13 / Big Data and Hadoop

Programme : B.Tech.
Duration: 3 Hrs.Branch/Specialisation :
Maximum Marks: 60

Instructions:

- i) All questions are compulsory. Internal choices, if any, are indicated. Assume suitable data where ever required.
ii) All questions carry equal marks.

Answers of MCQs/True /False/ Fill in the blanks should be written in full instead of only a, b, c or d.

		Marks	BL	CO	PO
Q 1	i. Big data is characterized by three main V's: Volume, Velocity, and _____ (a) Variability (b) Variety (c) Virtualization (d) Viability	1	1	1	1,12
	ii. Which of the following refers to the process of estimating a value based on statistical data? (a) Prediction Error (b) Sampling (c) Inference (d) Regression	1	1		
	iii. Explain the challenges of conventional systems in handling big data	4	2		
	iv. Explain the concept of "Sampling Distributions" in statistics. Why is it important in the context of Big Data	6	2		
OR					
	Differentiate between Analysis and Reporting in the context of data processing.	6			
2	i. Which of the following is a primary reason for the need for Hadoop? (a) Processing small datasets (b) Handling structured data only (c) Cost-effective processing of large datasets (d) Replacing traditional databases	1	1	2	1,2,3
	ii. Which one of the following is false about Hadoop? (a) It is a distributed framework. (b) The main algorithm used in it is Map Reduce (c) Hadoop is an open source software platform (d) Hadoop Framework is written in Python	1	1		
	iii. Describe Rack Awareness and its advantages in Hadoop.	4	2		
	iv. Briefly describe the role of a Hadoop cluster and how it helps in processing big data.	6	2		
OR					
	List any four tools in the Hadoop ecosystem and briefly mention their primary function.	6			

Q.3 i. In an Election Vote Count using MapReduce, if the input is "BJP BJP INC", what would the Mapper output be? 1 1 3
 (a) (BJP, 2), (INC, 1) (b) (BJP, 1), (BJP, 1), (INC, 1)
 (c) (BJP INC, 3) (d) (BJP, 1), (INC, 2)

ii. What is the role of the Secondary NameNode? 1 1
 (a) Acts as a backup for the NameNode by maintaining a copy of the file system metadata
 (b) Processes data blocks directly
 (c) Manages resource allocation for jobs
 (d) Executes the MapReduce algorithm

iii. Explain block replication in HDFS and its significance in fault tolerance. 4 2

iv. Describe the MapReduce architecture with a suitable example. 6 2

OR

Briefly describe the role of the ResourceManager and NodeManager in the YARN architecture. 6

Q.4 i. Hadoop Hive is primarily used for: 1 1 4
 (a) Real-time data processing
 (b) Batch processing of structured data
 (c) Stream processing (d) Graph processing

ii. Which language is primarily used to write Hive queries? 1 1
 (a) SQL like language (b) Python like language
 (c) Java like language (d) Scala like language

iii. How does Hive differ from a traditional RDBMS? 4 2

iv. Explain the process of creating a table in Hive and inserting data into it. 6 2

OR

What are Hive partitions and buckets? Explain their significance in query optimization. 6

i. Which of the following is a NoSQL database in the Hadoop ecosystem? 1 1 5 2
 (a) Hive (b) HBase (c) Pig (d) Sqoop

ii. Apache Pig is used to process data using a high-level scripting language called _____. 1 1
 (a) SQL++ (b) HiveQL (c) PQL (d) Pig Latin

iii. What are the primary advantages of using Pig over MapReduce? 4 2

iv. Discuss the applications of Sqoop, Flume, and Oozie in Hadoop. 6 2

OR

Compare the following terms:

(a) Pig vs Hive

(b) SQL vs NoSQL

6

IPS ACADEMY**Institute of Engineering and Science, Indore (M.P.)**

(A UGC Autonomous Institute, Affiliated to RGPV)

Examination June - 2025

PCC-IO12 / PEC-DS02(A) / Cyber Security

Programme: B.Tech

Duration: 3 Hrs.

Branch/Specialisation: IOT/D
Maximum Marks: 60**Instructions:**

- (i) All questions are compulsory. Internal choices, if any, are indicated. Assume suitable data where ever required.
- (ii) All questions carry equal marks.

Answers of MCQs/True /False/ Fill in the blanks should be written in full instead of only a, b, c & d

Q.1 i. The technique involving small, unnoticed thefts from multiple accounts over time is called _____ attack.
(A) Spamming (B) Salami. (C) Spoofing (D) Phishing

Marks	BL	CO
1	1	1

- ii. Which of the following is NOT a classification of cybercrime?
(A) E-mail Spoofing (B) Internet Time Theft
(C) Software Development, (D) Spamming

1	1
---	---

- iii. Explain what is meant by "Internet Time Theft" with an example.

4	2
---	---

- iv. Describe the challenges of cybercrime faced by individuals and organizations in the digital age.

6	2
---	---

OR

Explain the concept of E-mail Spoofing and how it can be prevented.

6	2
---	---

- Q 2 i. Software Piracy involves the unauthorized copying or distribution of copyrighted software. [True/False]

1	1	2
---	---	---

- ii. The act of taking control of a user's web session is known as _____ hijacking.
(A) Password (B) Session (C) Network (D) Identity

1	1
---	---

- iii. Differentiate between Identity Theft and Online Frauds with one example each.

4	2
---	---

- iv. Discuss the role of hackers and extremists as cyber criminals and their impact on cyber security.

6	2
---	---

OR

Explain what Web Jacking is and describe methods to protect against it.

6	2
---	---

- 3 i. Under the IT Act, 2000, which of the following is considered a cybercrime?

1	1	3	1
---	---	---	---

- (A) Sending spam emails (B) Hacking into a system
(C) Cyber Fraud (D) All of the above

- ii. Who typically commits hacking?

1	1
---	---

- (A) Teenage Web Vandals (B) Business professionals
(C) Legal consultants (D) Government officials

	iii.	Briefly explain the concept of jurisdiction in cybercrimes under the IT Act, 2000	4	2		
	iv.	Discuss the strategies to tackle cybercrime as outlined in the IT Act, 2000.	6	2		
		OR				
		Explain the penalties for Cyber Fraud and Cheating under the IT Act, 2000, with examples.	6			
Q.4	i.	Electronic records are admissible as evidence under the Indian Evidence Act of 1872 alone, without the IT Act, 2000. [True/False]	1	1	4	1;
	ii.	The process of verifying the authenticity of an electronic message is known as proving _____. (A) Digital Signatures (B) Electronic Agreements (C) E-Evidence (D) Probative Value	1	1		
	iii.	What is the role of digital signatures in proving electronic records?	4	2		
	iv.	Explain the relevancy, admissibility, and probative value of electronic evidence under the IT Act, 2000.	6	2		
		OR				
		Discuss how electronic agreements are proved under the Indian Evidence Act and IT Act, 2000.	6			
5	i.	Which of the following is a tool used to capture keystrokes on a computer? (A) Proxy Server (B) Keylogger (C) Trojan Horse (D) Virus	1	1	5	1,2.
	ii.	What is the primary purpose of a proxy server in cybercrime? (A) To encrypt data (B) To conceal the identity of the user (C) To track user activity (D) To block malicious websites	1	1		
	iii.	Describe the difference between a DoS attack and a DDoS attack.	4	2		
	iv.	Explain the working of Phishing techniques and how they can be prevented.	6	2		
		OR				
		Discuss the role of Key loggers and Spyware in cybercrime, along with methods to detect and remove them.	6			

IPS ACADEMY
Institute of Engineering and Science, Indore (M.P.)
 (A UGC Autonomous Institute, Affiliated to RGPV)
 Examination June - 2025
 PCC-DS14 / Machine Learning-II

Programme : B.Tech.
 Duration: 3 Hrs.

Branch/Specialisation : DS
 Maximum Marks: 60

Instructions:

- i) All questions are compulsory. Internal choices, if any, are indicated. Assume suitable data where ever required.
 ii) All questions carry equal marks.

Answers of MCQs/True/False/ Fill in the blanks should be written in full instead of only a, b, c or d.

	Marks	BL	CO	PO
Q.1 i Which of the following is true about SVM?	1	1	1	1,2,3,4,5
a) SVM works only for linearly separable data				
b) SVM can use kernels to handle non-linearly separable data				
c) SVM does not work well for high-dimensional data				
d) SVM is always better than decision trees				
ii. What is the main function of a kernel in SVM?	1	1	1	1,2,3,4,5
a) Reduce the number of features				
b) Map data to a higher-dimensional space				
c) Improve training speed				
d) Remove outliers from the dataset				
iii Explain the concept of VC Dimension in the context of SVM	5	3	1	1,2,3,4,5
iv Compare SVM with Decision Tree in terms of performance, and interpretability.	5	4	1	1,2,3,4,5
OR				
Explain the advantages and disadvantages of SVM.	5	3	1	1,2,3,4,5
i. What does entropy measure in a Decision Tree?	1	1	2	1,2,3,4,5
a) Purity of a node				
b) Number of branches				
c) The height of the tree				
d) Number of leaves				
ii. Which method is used to reduce overfitting in Random Forest?	1	1	2	1,2,3,4,5
a) Increasing the number of trees				
b) Using a single decision tree				
c) Reducing data size				
d) Ignoring pruning				
ii Derive the mathematical formulation of Information Gain in Decision Trees.	5	3	2	1,2,3,4,5
v Explain the concept of Bagging in Random Forest.	5	3	2	1,2,3,4,5
OR				
Discuss pruning techniques in Decision Trees.	5	2	2	1,2,3,4,5

Q.3	i.	Which activation function suffers from the vanishing gradient problem? a) ReLU b) Sigmoid c) Tanh d) Softmax	1	1	3	1,
	ii.	What is the role of bias nodes in a neural network? a) To increase the training speed b) To shift the activation function c) To reduce model complexity d) To increase the number of neurons	1	1	3	1,
	iii.	Explain backpropagation with an example.	5	3	3	1,2
	iv.	Differentiate between Feedforward Neural Networks and Recurrent Neural Networks.	5	2	3	1,2
OR						
		Discuss various types of activation functions.	5	2	3	1,2
Q.4	i.	Which optimization algorithm is commonly used in Deep Learning? a) Adam b) K-Means c) Decision Trees d) Apriori	1	1	4	1,2
	ii.	What is the purpose of dropout in deep learning models? a) To reduce computation time b) To prevent overfitting c) To increase neuron connections d) To adjust learning rate	1	1	4	1,2
	iii.	Discuss the importance of loss functions in deep learning.	5	2	4	1,2
	iv.	Explain the concept of Multiclass Classification using Deep Neural Networks.	5	3	4	1,2
OR						
Q.5	i.	Which of the following is a type of pooling in CNN? a) Max Pooling b) Mean Pooling c) Average Pooling d) All of the above	1	1	5	1,2,3
	ii.	What is the primary role of convolutional layers in CNN? a) Feature extraction b) Reducing dataset size c) Increasing training speed d) Handling missing values	1	1	5	1,2,3
	iii.	Describe the working of feature selection in CNN.	5	2	5	1,2,3
	iv.	Explain the process of CNN visualization.	5	3	5	1,2,3
OR						
		Discuss the role of optimization techniques like Genetic Algorithms in CNN.	5	2	5	1,2,3

Examination June - 2025

PCC-DS15 / Natural Language Processing

Programme : B.Tech.

Duration: 3 Hrs.

Branch/Specialisation: DS

Maximum Marks: 60

Instructions:

- (i) All questions are compulsory. Internal choices, if any, are indicated. Assume suitable data where ever required.
- (ii) All questions carry equal marks.

Answers of MCQs/True/False/ Fill in the blanks should be written in full instead of only a, b, c or d.

Q.1		Marks	BL	CO	PO
i.	In NLP, what is the purpose of the Argmax computation? a) To find the highest probability outcome b) To normalize text data c) To extract keywords from a document d) To train a deep learning model	1	1,3	1	1,2,3
ii.	Which of the following resources is a collaborative dictionary used for lexical semantics? a) WordNet b) Wikipedia c) Wiktionary d) Open NLP	1	1,3		
iii.	What is Argmax computation in NLP? Explain with an example where it is used in language models.	5	1		
iv.	Discuss Word Sense Disambiguation (WSD) and its importance in NLP. How does WordNet help in this process?	5	3		
OR					
	Explain the different stages of Natural Language Processing (NLP) with examples. How do these stages contribute to understanding and generating human language?	5	3		

Q.2	i.	What is the process of converting words into their base or root form called? a) Tokenization b) Stemming c) Lemmatization d) Part-of-speech tagging	1	1,3	2	2,3
	ii.	Which algorithm is commonly used in named entity recognition? a) K-means clustering b) Hidden Markov Models (HMM) c) Apriori algorithm d) Decision trees	1	1,3		
	iii.	Explain different parsing algorithms used in NLP. How do top-down parsing algorithms work, and what are their advantages and limitations?	5	2		
	iv.	What is probabilistic parsing, and how does it differ from traditional parsing methods? Explain how sequence labelling is used in probabilistic parsing.	5	3		

OR

Explain the Grammar? Draw the tree of Non-Noun Grammar using top down parsing Algorithm.

Input- The little boy ran quickly.

- 1.<sentence> -> <noun phrase> <verb phrase>
- 2.<noun phrase>-> <adjective> <noun phrase>
/ <adjective><singular noun>
- 3.<verb phrase> -> <singular verb> <adverb>
- 4. <adjective> -> a/ the/ little

Q.3	i.	What is the purpose of the Bag-of-Words (BoW) model in NLP?	1	1,3	
		a) To represent words as vectors			
		b) To calculate word frequencies			
		c) To identify syntactic dependencies			
		d) To perform sentiment analysis			
	ii.	Which NLP library in Python provides a comprehensive set of tools for natural language processing?	1	1,3	
		a) TensorFlow			
		b) PyTorch			
		c) NLTK (Natural Language Toolkit)			
		d) Scikit-learn			
	iii.	Discuss Hidden Markov Models (HMM) and their role in speech recognition. How do they help in modeling sequential data, and what are their limitations?	5	2	
	iv.	What is Morphology in NLP? Explain different types of morphological analysis and their importance in language processing.	5	1	
		OR			
		Explain the concept of Arguments and Adjuncts in linguistic structure. How do they contribute to sentence formation and meaning in Natural Language Processing (NLP)?	5	3	
Q.4	i.	Which NLP task involves determining whether one text logically follows from another?	1	1,3	4
		a) Part-of-Speech (POS) Tagging			
		b) Sentiment Analysis			
		c) Text Entailment			
		d) Named Entity Recognition (NER)			
	ii.	Which of the following machine translation tools is primarily used for statistical alignment of parallel texts?	1	1,3	
		a) Moses			
		b) GIZA++			
		c) OpenNMT			
		d) BERT			
	iii.	Discuss the Viterbi Algorithm and its role in sequence prediction. How does it improve efficiency in NLP tasks such as speech recognition and POS tagging?	5	2	
	iv.	What is phonology in linguistics? How does it contribute to Automatic Speech Recognition (ASR) and speech synthesis?	5	3	
		OR			
		Describe the working of GIZA++ and Moses in Machine Translation (MT). How do they help in aligning and translating parallel texts?	5	3	
Q.5	i.	Which method is used to assign a sentiment label to a given text?	1	1,3	5
		a) Named entity recognition			
		b) Sentiment analysis			
		c) Part-of-speech tagging			
		d) Dependency parsing			
	ii.	Which technique is used to identify and extract specific pieces of information from unstructured text?	1	1,3	
		a) Sentiment analysis			
		b) Text classification			
		c) Named entity recognition			
		d) Word sense disambiguation			
	iii.	Discuss Precision, Recall, and F-score as evaluation metrics in NLP. How do they help in assessing model performance?	5	1,2	
	iv.	What is the Universal Networking Language (UNL)? Explain its purpose and how it facilitates multilingual communication.	5	1,3	
		OR			
		Describe the Baum-Welch Algorithm and its role in training Hidden Markov Models (HMM). How does it use the Expectation-Maximization approach?	5	1	

IPS ACADEMY

Institute of Engineering and Science, Indore (M.P.)
(A UGC Autonomous Institute, Affiliated to RGPV)

Summer June - 2025

IOC-MA01 (A) / Scientific Aptitude

Programme: B.Tech.

Duration: 3 Hrs.

Branch/Specialisation: CSE/CSIT

Maximum Marks: 60

Instructions:

- All questions are compulsory. Internal choices, if any, are indicated. Assume wherever required.
- Calculator is not allowed in this paper.

Answers of MCQs/True/False/ Fill in the blanks should be written in full instead of

- Q.1 i. A Shopkeeper sold an article at 30% loss if the selling price is 350 find the cost price?
(a) 500 (b) 200 (c) 450 (d) 600

- ii. What is the difference between 0.9 and 0.9%?
(a) 0.891 (b) .009 (c) 0.981 (d) 0.198

- iii. Ravi starts some business with Rs. 70,000. After 4 months, Manish joins him with Rs. 80,000. At the end of the year, in what ratio should they share the profit?
2 : 1 : 16

OR
The fourth proportion to 12, 24 and 27 is the same as the third proportion to A and 36. What is the value of A?

- iv. What is the compound interest on Rs. 25,000 for 3 years at 10% per annum compounded annually?
33225

OR
If the simple interest at the same interest rate on Rs. 500 for 4 years and Rs. 700 for 2 years, combined together, is Rs. 280, then what is the rate of interest?

- Q.2 i. A bus covered a distance of 162 km. If speed of this bus is 15 m/s, then what will be the time taken?
a) 3 hours ✓ b) 2 hours c) 5 hours d) 4 hours

- ii. In what ratio must a shopkeeper mix Peas and Soybean of Rs. 16 and Rs. 25 per kg respectively, so as to obtain a mixture of Rs. 19.50?
a) 3 : 7 b) 5 : 7 c) 11 : 7 ✓ d) 7 : 5

- iii. E and F are two friends working together to finish a work in 24 days and E alone can do the same work in 36 days. In how many days can F alone complete the work?
72 days

OR
Acid and water are mixed in a vessel A in the ratio of 5 : 2 and in the vessel B in the ratio 8 : 5. In what proportion should quantities be taken out from the two vessels, so as to form a mixture in which the acid and water will be in the ratio of 9 : 4?

- iv Two trains whose lengths are 450 meters and 300 meters are moving towards each other at the speed of 162 km/h and 108 km/h respectively. If distance between trains is 300 meters, in how much time, these trains will cross each other? *2.5 min* 4 5

OR

The average age of the committee of 10 members is 40 years. A member of age 52 retires and a new member of age 38 takes his place. What is the average age of the present committee? 4

- Q.3 i. A bag contains 6 white and 4 black balls. 2 balls are drawn at random. Find the probability that they are of same color. 2 5
a) $1/2$ b) $7/15$ $\times$ c) $8/15$ d) $1/9$

- ii. A person draws 3 cards from a pack of 52 cards (With replacement). Find the probability of getting all three red cards 2 5
a) $1/10$ b) $2/7$ c) $1/8$ $\times$ d) $2/3$,

- iii 1) In how many different ways can the letters of the word 'RECTITUDE' be arranged so that the vowels come together? 4 4

2) In how many different ways can the letters of the word 'DESIGN' be arranged so that the vowels are at the two ends?

OR

- 1) In how many different ways can the letters of the word 'BANKING' be arranged? *2520* 4 4

2) How many words of three letters can be created using only consonants of the English Alphabet? *1330*

- iv Three unbiased coins are tossed up together. Find the Probability of getting- 4 4
A. All heads B. At least one tail *7/8* C. Exactly 2 heads *3/8*
D. At least one head *7/8* E. At least 2 tails *1/2*

OR

Two fair dice are thrown. Find the probability of getting a number whose sum is divisible by 2 or 4 ? 4

- Q.4 i. Introducing a boy, a girl said, "He is the son of the daughter of the father of my uncle." How is the boy related to the girl? 2 5
a) Brother b) Father c) Uncle d) Nephew

- ii. In certain code 'TIGER' is written as 'QDFHS'. How is 'FISH' written in that code? 2 5
a) GERH b) GRHE c) GREH d) GHRE

- iii If it was Tuesday on 8th Jun 1928, then what day was it on 21st October, 1993? 4 5

OR

Saturday falls on 9th September 1811, what was the day of week on 9th September 1825? *Tuesday* 4 4

- iv A driver left his village and drove North for 20 km/s. After which he stopped for breakfast. Then he turned left and drove another 30 km/s, when he stopped for lunch. After some rest, he again turned left and drove 20 km/s before stopping for evening tea. Once more he turned left and drove 30 km/s to reach the town where he had supper. After evening tea in which direction did he drive? *East* 4 4

OR
Eight children P, Q, R, S, T, U, V and W are seated around a square dining table, all facing towards the centre. Some of them are sitting at the corners while some are sitting at the exact centre of the sides of the table. V is seated at a corner and R is seated at the middle of one of the sides. S is an immediate neighbour of R. Q is seated third to the right of V. There are exactly two children sitting between Q and S. T is an immediate neighbour of both V and P. W is seated second to the left of S. If U is not an immediate neighbour of V, where is R seated?

- Q.5 i. Find the ~~wrong~~ number in the series : *Weight*
361, 323, 285, 247, ?
a) 215 b) 227 c) 209 d) 232
- ii. Find the ~~wrong~~ number in the series :
10, 14, 31, 35, 73, 77, ?
a) 157 b) 90 c) 81 d) 154

- iii. Three different positions of the same dice are shown. Find the number on the face opposite the face having '2', '3', '5'?

OR

- Three different positions of the same non-standard dice are shown. Which letter will be on the face opposite the face with the letter 'Q', 'T', 'S'?

- iv. **Direction:** Study the following information carefully and answer the given question.

P, Q, R, S, T, V and W are seven members in a family, out of which there are three females and four males. There are two managers, two lawyers, one teacher, one engineer and one doctor. No lady is either teacher or engineer. R is a lawyer and is married to P, who is a teacher. V, the engineer, is married to S, who is neither lawyer nor doctor. No two ladies have the same profession. Q is the sister of W. Who is a manager?

What is T's profession?

Which of the following is the group of males?

What is Q's profession?

Who among them has the same profession as that of W?

OR

- Direction:** Study the following information carefully and answer the given question.

Seven persons are sitting around a circular dining table facing towards the centre. S is sitting to the immediate left of Y and third to the right of R. R is sitting to the immediate left of A and immediate right of P. A is sitting to the immediate left of D. Q is sitting to the immediate left of P. If D exchanges seat with Y and P with Q, then who is sitting to the immediate right of D?

Examination June-2025

HSMC-HS05 (D) / Japanese Language

Branch/Specialisation: CSE, AIML
Maximum Marks: 60

Programme : B.Tech.

Duration: 3 Hrs.

Instructions:

- (i) All questions are compulsory. Internal choices, if any, are indicated. Assume suitable data where ever required.
 (ii) All questions carry equal marks.

Answers of MCQs/True /False/ Fill in the blanks should be written in full instead of only a, b, c or
 Marks BL CO PC
 Q 1 1. Look at the picture and mark the most appropriate expression from among the options given below. 1

- a. いただきます
 b. すみません
 c. おやすみなさい
 d. おはようございます

2 1 6,9,10

- ii. The script used for writing words borrowed from foreign languages is known as 1
 a). カタカナ b). ひらがな
 c). にほんご d). かんじ

- iii A. Write the following series in Hiragana 5
 a. Ra b. Sa c. Da d. Pa e. Ka

- B. Write the following greetings in Japanese using the Hiragana script. 5

- a). Good Day/ afternoon b). Good evening
 c). How are you? d). Sorry
 e). Thank you very much.

OR

- iii Write the following numbers in Hiragana 10
 a). 603 b). 8345 c). 717 d). 999 e). 58
 f). 1009 g). 3128 h). 5031 i). 34 j). 423

Q.2 i. Mark the odd one out of the given set of words
 a). に がつ b). じゅう がつ
 c). はち がつ d). はっし

1

ii. The correct way to write the word **toshokan** is
 a). としょうかん
 b). としょかん
 c). としよかん
 d). とよかん

1

iii. A. Read the following sentences carefully and write the time (in Japanese) for the information given in bold letters using Hiragana

5

a) It's 4 P.M. and the train has arrived. It will leave after 15 minutes. At what time the train is scheduled for the departure?

b) My flight is scheduled to depart at 7:50 A.M and it is mandatory to reach the airport one hour before the scheduled departure. At what time I must reach the airport?

c) Every day I have my lunch at 12:00 noon.

d) Tanaka San comes back from the office when the clock shows 20 minutes past 7 o'clock.

e) Every morning I wake up at 5:30.

1

B Write the weekdays in Hiragana.

5

OR

A Write the first ten days of a month in Japanese using the Hiragana script.

5

B How will we tell a date in Japanese way? Write using Hiragana script.

5

- a). 7th Sep 2001
- b). 14th July 1885
- c). 20th Dec 1546
- d). 15th March 1998
- e). 23rd February 2024

Q.3 i. うえ,した,なか are some examples of -

1

- a). Adjectives
- b). Nouns
- c). Prepositions
- d). None of these

ii. おもしろい means

1

- a). fat
- b). thin
- c). interesting
- d). tasteless

iii. A. Describe the given picture in five sentences using the prepositions which you have studied.

5

B. Write a short note on the adjectives. Also, write any five pairs of adjectives (pairs of opposites) using the Hiragana script and write the meanings of the adjectives in English.

5

OR

Mention any five prepositions in Japanese Language. Write the meaning of the prepositions and frame two sentences for each of them. (to be written in Hiragana)
